Real Cream. Real Profits. Real Simple.

Your customers want cream for their coffee. You want to deliver a quality product that's hassle-free and low-cost. Introducing the Cream Machine, the single best way to include cream in your coffee service.

It's Easy. There are no tools necessary, and no special expertise required. Simply place the product bag right into the machine. It's a totally enclosed system and the bag fits perfectly. There's no refrigeration needed, until the bag is opened. Then the cream is cooled by the machine, which also comes equipped with a self-defrosting system. Best of all, there's no clean-up necessary. Both the bag and nozzle are fully disposable.

It Saves You Money. Our bag-in-a-box products cost less per ounce than any creamer cup on the market. We're so sure of it that we'll match or beat the price of any comparable creamer cup. Just ask.

It Eliminates Waste. Did you know that over 35% of creamer cups are wasted or removed from the premises for later use? The Cream Machine eliminates both pilferage and waste. There are no cups to take. And with precise delivery of the cream from the nozzle, customers take only what they will use. By reducing cream cup waste, the Cream Machine is an environmentally friendly solution. There's also no wasted counter space. The Cream Machine measures a compact 9.5 inches wide.

It's Clean. You've seen the creamer cups on ice or just sitting out. That's a potential Board of Health issue waiting to happen. With the Cream Machine, you don't have to worry about sanitation. All bags are coded and self-contained. They are shelf-stable without refrigeration so there is never a problem with spoilage. In addition, the dispensing system ensures 99% evacuation of all bags with no product integrity issues.

It's Good—and Good For You. Importantly, we don't use chemicals. Our cream is fresh, natural 100% cream made right here in the USA. It's the healthy choice. That's why it tastes so good—consistently, time and time again.

You Can Count on The Cream Machine.

We manufacture our own products to help ensure uninterrupted service. Should you ever need it, our nationwide service plan provides equipment replacement within 24 business hours.

Join the thousands of customers nationwide who are already enjoying the advantages of The Cream Machine. Ask about our loaner programs at 1-800-948-1922.

Available in Two Convenient Sizes!
